"I wanted people around the world to come together and teach others about epilepsy."
 CASSIDY MEGAN, FOUNDER OF PURPLE DAY

- There are approximately 50 million people around the world living with epilepsy.
- It's estimated that 1 in 100 people have epilepsy
- There are more than 300,000 Canadians living with epilepsy.
- Epilepsy is NOT contagious. Epilepsy is NOT a disease. Epilepsy is NOT a psychological disorder.
- There is currently no "cure" for epilepsy. However, for 10-15% of people with epilepsy, the surgical removal of the seizure focus – the part of brain where the person's seizures start – can eliminate all seizure activity. For more than half of people with epilepsy, medication will control their seizures. Additionally, some children will outgrow their epilepsy and some adults may have a spontaneous remission.

World Glaucoma Week 2018: Plan & Prepare
 March 11-18, 2018 marks the annual World Glaucoma Week. This collaborative project between the World Glaucoma Association and the World Glaucoma Patient Association contributes to the elimination of glaucoma blindness by alerting people to have regular eye checks, including optic nerve checks. The theme this year is Green = Go get your eyes tested for Glaucoma: **Save Your Sight!**

<http://www.wgweek.net/>

World Water Day, on 22 March every year, is about focusing attention on the importance of water. The theme for World Water Day 2018 is **'Nature for Water'** – exploring nature-based solutions to the water challenges we face in the 21st century.

Damaged ecosystems affect the quantity and quality of water available for human consumption. Today, 2.1 billion people live without safe drinking water at home; affecting their health, education and livelihoods.

Sustainable Development Goal 6 commits the world to ensuring that everyone has access to safe water by 2030, and includes targets on protecting the natural environment and reducing pollution.

Take action

Wherever you are and whatever you do on March 22, make it about nature and water.
